Important Safety Information

1. Please read this section carefully before using the unit.

2. After the arm cuff starts to inflate, press and hold the START/STOP button.

3. If your systolic or diastolic pressure is outside the standard range, the heartbeat symbol will blink. Please refer to Section 3.3. If this error continues to be displayed, please consult your doctor.

4. If there are any abnormalities during the measurement, remove the arm cuff.

5. Do not pinch. Do not place under heavy objects.

6. Do not twist. Do not bundle during use.

7. Do not tamper with the device. Do not forcibly bend or pull it.

8. To unplug the air plug, pull on the air plug at the connection with the main unit.

9. Do not forcibly bend the arm cuff or bend the air tube excessively.

10. For specific information about your own blood pressure, consult your doctor.

12. The unit should be cleaned with a soft, dry cloth. Use a soft, slightly moistened cloth to clean the blood pressure monitor or its accessories. Do not use benzine, alcohol,或其他 petroleum products.

13. Regular maintenance is essential to ensure the device is working correctly.

14. Replacement parts and accessories should be used only under the recommendation of the manufacturer.

15. Do not wash the arm cuff or immerse it in water.

16. The arm cuff should be replaced at 2-year intervals. You should replace them when the labels are not legible or when the cuffs are too small or too large to wrap around the arm.

17. The display may not operate if the AC adapter is disconnected while the unit is on. In this case, the unit will return to the condition prior to taking the blood pressure measurement. Waiting between readings allows the arteries to relax.

18. Pressure sensors are produced in Japan.

19. Black market sale of this product is illegal. Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial waste. Business users should contact their local government office, for details of where and how they can dispose of their waste products.

20. This medical device manufactured by OMRON HEALTHCARE conforms to this standard. The standard has been implemented. This standard defines the levels of immunity to electromagnetic interference as well as maximum levels of electromagnetic emissions from the end product. Electromagnetic interference (EMI) is an unavoidable phenomenon that occurs in all electrical appliances. Interference that is generated from the device is not harmful to human health and is minimal compared to natural background noise. The interference that is caused by the device is within the limits specified by This standard.

21. Forgeware may cause the display to be discolored. If this should occur, please consult your doctor.

22. Movement during measurement may result in incorrect measurement results.

23. Please check the cable before use. If the cable is damaged or worn, replace it with a new model.

24. After the arm cuff is inflated, it will take about 30 seconds to initiate the measurement. Remove the arm cuff if the measurement is completed with the measurement result.
